    messages are printed to standard error.
-v: verbose mode. The prompt includes a short list of all
    commands and additional information (eg.errors).
-r <filename>: input initial recipe files
-i <filename>: input initial inventory files

SYNOPSIS

Dinner Plan program is used for reading, storing and operating
on recipes. The program will maintain a current collection of
recipes, a current ingredient inventory, a current equipment
inventory, a current menu list and a current verbose state.
This program allows the user to input any one of several
commands. The input will be in the form of a number (0-22).

In verbose mode, the user prompt includes a short list of all
commands (i.e., the numbers and a one-word description along
with parameter if any) and other additional information.
In silent mode, there is no prompt and there is no output to
the console. Error messages are printed to standard error.
